

Abstract Submitted  
for the 4CF12 Meeting of  
The American Physical Society

**Carbon Nanotube Microfabrication** STEVEN NOYCE, ROBERT DAVIS, RICHARD VANFLEET, Brigham Young University — An overview of several unique and powerful methods of microfabrication using Carbon Nanotubes as the basic framework for fabricating a myriad of incredible devices will be presented. Countless astounding properties and useful material properties can be obtained with one of the world's most extraordinary nanomaterials combined in creative combinations. A summary of several years of research will be presented along with recent developments and continuing areas of focus.
