

Abstract Submitted
for the 4CF17 Meeting of
The American Physical Society

SEPh. XITLALLY SALMON, NMSU — The Society for Engineering and Physics (SEPh) is a new organization working towards providing a professional society for Engineering Physics, as well as bridging the gap between the two fields both on a local level at NMSU and on a National level . To accomplish this goal, SEPh focuses on student projects, allowing students to design and create projects that show interesting physical principles, such as a Tesla Coil or a Telescope. Additionally, SEPh focuses its efforts on public outreach, using our projects to show Engineering Physics to the community. Through these efforts, we hope to provide a network for Engineering Physics students, faculty and industry partners as well as encourage children to explore Engineering and Physics.
