ω_c **Studies** VERONIQUE ZIEGLER, University of Iowa, BABAR COLLABORATION — We report on studies of the Ω_c^0 charm baryon using $220 fb^{-1}$ of data collected by the BaBar experiment. The decay of Ω_c^0 into several hadronic final states, involving an Ω^- or a Ξ^- hyperon is analyzed. The invariant mass spectrum of selected events in data is presented for each of the decay modes considered.
