The American Physical Society

Study of $B^+ \rightarrow D^0 K^{*+}$ decays GUILLAUME THERIN, University PARIS VI and VII, BABAR COLLABORATION — A search for direct CP violation using the Gronau-London-Wyler (GLW) and Atwood-Dunietz-Soni (ADS) methods in $B^+ \rightarrow D^0, \bar{D}^0 K^{*+}$ decays is presented. The data sample used corresponds to $211 fb^{-1}$ taken with the BaBar experiment. The results on the CP observables and the constraints on the CKM angle γ are discussed.
