Observation and Measurements of Semileptonic B decays to D^{} Mesons** DMITRI TSYBYCHEV, State University of New York, Stony Brook —
Using 460 pb^{-1} of integrated luminosity accumulated with the $D\bar{O}$ detector, we have observed the semileptonic decays $B \rightarrow \mu\mu D_1^0(2420)X$ and $B \rightarrow \mu\nu D_2^{*0}(2460)X$. The results on their branching rates are presented.
