The American Physical Society

**Observation of  $D_s^{**}$  states in semileptonic  $B$  decays** JASON RIEGER,  
Indiana University, DZERO COLLABORATION — Using  $460 \text{ pb}^{-1}$  of integrated  
luminosity accumulated with the DØ detector, we have observed the semileptonic  
decays  $B \rightarrow \mu\mu D_s^{**}$  where the different excited  $D_s^{**}$  are reconstructed in the mode  
 $D_s^{**} \rightarrow D^* K_S^0$ . Mass peaks in the invariant mass of  $D^* K_S^0$  are presented.
