the American Physical Society

ϕ_2 and ϕ_3 related CP Violation Measurements

HIROAKI AIHARA, University of Tokyo

We present the recent results from BaBar and Belle experiments on the measurements of the angles, $\phi_2(\alpha)$ and $\phi_3(\gamma)$, in the CKM unitarity triangle. The results include measurements of CP violation in charmless B decays such as $B^0 \rightarrow \pi^+\pi^-$, and determination of $\phi_3(\gamma)$ based on $B \rightarrow DK$ Dalitz plot analysis.
