for the APR05 Meeting of
The American Physical Society

Recent Results from Besii $\psi(2S)$ Data ZIJIN GUO, BES COLLABORATION — Recent results will be reported based on analyses using sample of 14 million $\psi(2S)$ events collected with the BESII detector at the BEPC, including $\chi_{c0} \rightarrow f_0(980)f_0(980)$, $\chi_{c0,1,2} \rightarrow K^*(892)\bar{K}^*(892)$, $\chi_{c0,2} \rightarrow \omega\omega$ and χ_{cJ} mass and width measurement with γ conversion, and a study of $\psi(2S) \rightarrow \pi^0(\eta)p\bar{p}$.
