Abstract Submitted for the APR05 Meeting of The American Physical Society

Properties of the B_c **Meson** SHERRY TOWERS, State University of New York, Stony Brook, DZERO COLLABORATION — Using more than 250 pb⁻¹ of data collected with the DØ detector in Run II of the Tevatron, we study the B_c^+ meson in the $J/\psi\mu^+\nu$ and $J/\psi\pi^+$ final states. We use these events to measure the mass and the lifetime of the B_c .
