Ratios of Branching Ratios for Hadronic b Hadron Decays BORIS
IYUTIN, MIT, CDF COLLABORATION — The addition of the displaced track
trigger at the second trigger level has enabled CDF in Run II to study purely
hadronic b hadron decays. We present ratio of branching ratios for $B^+ \rightarrow \bar{D}^0 \pi^+$,
 $B^0 \rightarrow D^- \pi^+ (\pi^+ \pi^-)$, $B_s \rightarrow D_s^- \pi^+ (\pi^+ \pi^-)$ and $\Lambda_b \rightarrow \Lambda_c^- \pi^+$ and first observations of
doubly charmed B decays at Hadron Colliders.
