Abstract Submitted for the APR06 Meeting of The American Physical Society

Measurement of the branching fraction of B0 meson decay to $a_1\pi$ VINCENZO LOMBARDO, INFN Sezione di Milano, BABAR COLLABORATION — We present a measurement of the branching fraction of the decay $B^0 \rightarrow a_1^+\pi^-$. The data set consists of approximately 218 million $B\overline{B}$ pairs produced in electronpositron annihilation at the PEP-II collider and recorded by the BaBar detector.
