**Search for  $B^0$  meson decay to  $\eta'\eta'K_S^0$**  RICCARDO PELLEGRINI,  
INFN Sezione di Milano, BABAR COLLABORATION — We present preliminary  
results of a search for  $B^0$  meson decay to  $\eta'\eta'K_S^0$ . The data set consists of ap-  
proximately 232 million  $B\bar{B}$  pairs produced in electron- positron annihilation at the  
PEP-II collider and recorded by the BaBar detector.
