**Measurement of exclusive  $B \rightarrow X_u \ell \nu$  branching fractions using semileptonic tags** SHENJIAN CHEN, University of Colorado, BABAR COLLABORATION — Using  $210 \text{ fb}^{-1}$  of  $\Upsilon(4S)$  data collected with the BABAR detector at the PEP-II storage ring, we report the result of a measurement of branching fractions of exclusive  $B \rightarrow X_u \ell \nu$  decays. The accompanying  $B$  mesons are tagged with semileptonic  $B \rightarrow D^{(*)} \ell \nu$  decays.
