**Study of Z+Photon production and limits on anomalous couplings at Dzero** ALEXEI FERAPONTOV, Kansas State University, DZERO COLLABORATION — We present a measurement of Z+Photon production cross section and limits on anomalous Z Z Photon and Z Photon Photon couplings for form-factor scales of  $\Lambda = 750$  and  $1000$  GeV. The measurement is based on approximately  $1/\text{fb}$  of integrated luminosity collected by Dzero detector at a center-of-mass energy of  $1.96$  TeV.
