**Measurement of the  $W$ +jets Inclusive Jet Multiplicity Cross Sections at CDF** DALE STENTZ, Northwestern University, CDF COLLABORATION — We present preliminary measurements of the inclusive jet multiplicity cross sections for  $W$ +jets events produced in  $p\bar{p}$  collisions at  $\sqrt{s} = 1.96$  TeV.  $W$  bosons are identified by their decays to electrons and muons in a data sample corresponding to an integrated luminosity of approximately  $350 \text{ pb}^{-1}$ .
