

Abstract Submitted  
for the APR06 Meeting of  
The American Physical Society

**Study of  $B^{**}$  and  $B_s^{**}$**  MARK WILLIAMS, Lancaster University, DZERO  
COLLABORATION — Using  $1 \text{ fb}^{-1}$  of data collected with the DØ detector of the  
Tevatron, the excited states containing a  $b$  quark  $B_1$ ,  $B_2^*$  and  $B_{s2}^*$  are selected in  
exclusive decays. A precise measurement of their masses, widths and branching  
rates is reported.
