Ratios of Branching Fractions for Hadronic b Meson Decays

BORIS IYUTIN, MIT, CDF COLLABORATION — The addition of the displaced track trigger at the second trigger level has enabled CDF in Run II to study purely hadronic b hadron decays. We present ratio of branching fractions for $B^0 \rightarrow D^- \pi^+ (\pi^+ \pi^-)$, $B_s \rightarrow D_s^- \pi^+ (\pi^+ \pi^-)$ and $B^0 \rightarrow D_s^+ D^-$, $B_s \rightarrow D_s^+ D_s^-$. The latter provides a good handle to estimate $\Delta\Gamma/\Gamma$
