Abstract for an Invited Paper  
for the APR06 Meeting of  
the American Physical Society

**The glue that binds us all: probing gluonic matter with an electron-ion collider**

RAJU VENUGOPALAN, Brookhaven National Laboratory

Very little is known about the gluonic content of nuclear matter. Answering this question is crucial to our picture of hadron and nuclear collisions at high energies. We discuss some ideas about the nature of gluonic matter and how these can be tested at a future electron-ion collider.
