

Abstract for an Invited Paper
for the APR07 Meeting of
The American Physical Society

Heavy Flavor for the Perfect Java (QGP)

JAMES NAGLE, University of Colorado

In this presentation, we will review the latest experimental data from relativistic heavy ion collisions on heavy quarks and heavy quarkonia. Heavy quarks produced early in the collision time evolution give us great insight about the properties of the medium as they propagate through and eventually hadronize. Implications of current and future measurements will be detailed.
