

Abstract Submitted
for the APR07 Meeting of
The American Physical Society

On failures in education and public policy JOHN T.A. ELY, U of Washington — Education of the public and the resulting policies in many matters are grossly inadequate. Included as a small list of four samples of failings in vital matters are: 1. Societal Cohesiveness: A profound change in the school system will yield great benefit for the nation (<http://faculty.washington.edu/ely/publicservice.html>). 2. Lack of understanding regarding the coming avian flu pandemic (<http://faculty.washington.edu/ely/ElyFluMES.pdf>). 3. Severe Hg intoxication from dentistry due to profound multifaceted ignorance (Ely JTA, Mercury induced Alzheimer's disease: accelerating incidence? Bull Environ Contam Toxicol. 2001; 67(6),800-6). 4. The end of the world by global warming due to Christian religion forcing family planning money to be withheld from UN leading to population excess (<http://faculty.washington.edu/ely/CO2runaway.html>).
