The American Physical Society

**Decays of  $D$  mesons to final states containing  $\eta$  and  $\eta'$**  SHABANA NISAR, Syracuse University, CLEO COLLABORATION — We present new measurements of singly and doubly Cabibbo-suppressed decays of  $D$  mesons into final states containing  $\eta$  and  $\eta'$  mesons from CLEO-c. The study of these final states provides additional information on SU(3) symmetry breaking and final state interaction effects in  $D$  meson decays.
