Study of $B \rightarrow (J/\psi\pi\pi)K^*$ BRANDON DRUMMOND, University of Texas at Dallas, BABAR COLLABORATION — We present a search for $B \rightarrow X(3872)K^*$ with $X(3872) \rightarrow J/\psi\pi\pi$ produced in approximately 344 fb^{-1} of e^+e^- annihilations near 10.6 GeV. The search was carried out with data recorded by the BaBar experiment operating at the PEP-II asymmetric-energy e^+e^- storage rings at SLAC.
