***CP* Violation in $B \rightarrow J/\psi X$ Modes** KAREN GIBSON, University of Pittsburgh, CDF COLLABORATION — In the B^0 system, *CP* violation occurs dominantly via the CKM mechanism, which produces little violation of *CP* in the B_s^0 system. We report on the effort to measure the parameters: $\sin 2\beta$, which applies in the B^0 system (and which has already been tightly constrained at the *B* factories), and $\sin 2\beta_s$ which applies in the B_s^0 system (and which is expected to be small in the absence of additional, non-CKM sources of *CP* violation).
