Technique for an improved measurement of the $\Upsilon(4S) \to B^0\bar{B}^0$ branching fraction

ROMULUS GODANG, University of South Alabama, BABAR COLLABORATION — We present a technique for improving the determination of the $\Upsilon(4S) \to B^0\bar{B}^0$ branching fraction using data collected by the BaBar detector at the PEP-II asymmetric-energy $e^+e^-$ collider at SLAC. We present the projected precision of the improved measurement and what can be learned from such a measurement.
