

Abstract Submitted  
for the APR09 Meeting of  
The American Physical Society

**Study of  $D$  Meson Rare Semileptonic Decays at CLEO-c<sup>1</sup>** JUNYAN  
GE, Purdue University, CLEO COLLABORATION — Using data collected at the  
 $\psi(3770)$  resonance with the CLEO-c detector at the Cornell Electron Storage Ring,  
we present results of a study of rare semileptonic decays of the  $D$  mesons, including  
 $D^0 \rightarrow \rho^- e^+ \nu_e$ ,  $D^+ \rightarrow \rho^0 e^+ \nu_e$ ,  $D^+ \rightarrow \omega e^+ \nu_e$ ,  $D^+ \rightarrow \eta e^+ \nu_e$ ,  $D^+ \rightarrow \eta' e^+ \nu_e$ , and  
 $D^+ \rightarrow \phi e^+ \nu_e$ .
