

Abstract Submitted
for the APR09 Meeting of
The American Physical Society

APS Editorial Q&A — Following a brief ‘State of the Journals’ address by APS Editor-in-Chief, Gene Sprouse, and an introduction to the new APS publication, *Physics* (<http://physics.aps.org/>) by its Editor, David Voss, moderated questions and comments will be invited. Editors from *Physical Review C, D, Letters*, and *Physical Review Special Topics– Physics Education Research* will also be on hand to provide responses. Topics for discussion might include: possible enhancements of both content and delivery, implications of open access, recent and future changes to APS copyright, impact factors, growth in submissions, efficiency of the selection process, the quality of published articles, Outstanding Referees, or the concept of “significant” new physics. The editors look forward to a productive exchange.
