

Abstract Submitted
for the APR09 Meeting of
The American Physical Society

VERITAS Observation of Very High Energy Gamma-Ray Emission from 1ES1218+30.4 ASIF IMRAN, Iowa State University, VERITAS COLLABORATION — VERITAS, the Very Energetic Radiation Telescope Array System, is an array of four imaging Atmospheric Cherenkov telescopes located in southern Arizona. The VERITAS collaboration conducted an observation campaign of the high-frequency-peaked BL Lac object 1ES1218+30.4 during the 2008-2009 season. We will present spectral measurements and a light curve from these observations.
