Abstract for an Invited Paper
for the APR09 Meeting of
the American Physical Society

Working on an experiment half a world away

MORGAN WASCKO, Imperial College London

Particle physics is already one of the most global fields of study in an increasingly globalized world. I am an American physicist now employed and living in England, working on neutrino experiments in the US and Japan. I will discuss my experiences as a physicist living and working abroad, with tips for students interested in doing the same.
