

Abstract Submitted
for the APR10 Meeting of
The American Physical Society

An Investigation of Tools for Collaboration in Big Science DANIEL PISANO, Deming & Pisano LLC — It is both an economic and political reality that collaboration is essential in carrying out Big Science. A review of the literature of collaboration supports the view that it increases productivity. There are a number of tools available today on the Internet which foster collaboration. The author will present the results of an investigation of the utilization and effectiveness of these tools.
