Abstract for an Invited Paper
for the APR10 Meeting of
the American Physical Society

Broadening horizons via the off-campus undergraduate research experience in physics¹

STEPHEN MCGUIRE, Southern University and A&M College

This presentation focuses on the impact undergraduate research experiences have on a student's choice of graduate fields as well as longer term career paths. So significant has been its success in introducing students to the research culture that the REU has become an integral part of preparation for graduate study. Examples will be taken from off-campus appointments, mainly, involving students from Southern University and A&M College.
