Abstract for an Invited Paper
for the APR11 Meeting of
the American Physical Society

Modern Physics for Kids

MARJORIE BARDEEN, Fermilab

But it's the last chapter in the book! What should young people learn about modern physics? The setting could be a school classroom or a university lecture hall, laboratory or computer lab. The experience should build understandings and relationships. The approach should involve engagement and exploration. We discuss several activities for secondary students based on experiences of the particle physics community.
