Abstract for an Invited Paper  
for the APR11 Meeting of  
the American Physical Society

**Fermi observation of Dwarf Spheroidal Galaxies<sup>1</sup>**

JOHANN COHEN-TANUGI, Laboratoire Univers et Particules de Montpellier, Université Montpellier 2/IN2P3-CNRS

Dwarf spheroidal galaxies are one of the prime targets for indirect Dark Matter searches with gamma-ray instruments. In this talk, I will review observations and analyses of several dwarf spheroidal galaxies with the Fermi Large Area Telescope.
