Abstract for an Invited Paper  
for the APR12 Meeting of  
the American Physical Society

**Perspectives in Gravitational Physics**

BEVERLY K. BERGER, Retired

A personal view of the evolution (and occasional revolution) in gravitational physics over the past ten years will be provided through a comparison of “hot topics” ten years ago with current ones. Attention will focus on gravitational wave science, theoretical and experimental foundations of general relativity, and aspects of quantum gravity.
