Abstract for an Invited Paper
for the APR12 Meeting of
the American Physical Society

The Physic Source, a ComPADRE digital library, focusing on resources for teaching introductory physics
TAHA MZOUGH, Kennesaw State University

The Physics Source (<http://www.physicssource.org/>), a component of ComPADRE, was designed to help faculty teaching introductory physics courses identify and use high quality relevant curriculum and pedagogical resources in their teaching. Faculty can use Physics Source to find, share, and collaborate on building high-quality, effective teaching and learning materials. Users can also organize the content they like, and submit their own resources for inclusion in the library. Among the content included in the library are simulations, lab activities, classroom demonstrations, videos, information on some teaching techniques, and physics education research articles.
