Abstract for an Invited Paper
for the APR15 Meeting of
the American Physical Society

Perspective on IUPAP-ICWIP conferences and USA Participation

HERMAN WHITE, Fermilab

Starting in 1999, the (International Union of Pure and Applied Physics) IUPAP, General Assembly, passed a resolution to form an IUPAP Working Group on Women in Physics. This led to a number of international conferences that focused on analyzing the then current status of and progress in promoting women in physics for each country and world wide as well as sharing physics research progress and participation. I was twice a member of the USA delegation and participated in two of the last three of these conferences. I will present a perspective on the USA participation and contribution to the efforts of the conferences.
