Multifractality to Photonic Crystal & Self-Organization to Meta-materials through Anderson Localizations & Group/Gauge Theory\textsuperscript{1}

WIDASTRA HIDAJATULLAH-MAKSOED\textsuperscript{2}, Department of Physics, University of Indonesia, Depok 16424- Indonesia — Arthur Cayley at least investigate by creating the theory of permutation group[\texttt{F:\\Group\_theory.htm}] where in cell elements addressing of the lattice Qmf used a Cayley tree, the self-affine object Qmf is described by the combination of the finite groups of rotation & inversion and the infinite groups of translation & dilation[G Corso & LS Lacena: \textbf{“Multifractal lattice and group theory”}, Physica A: Statistical Mechanics & Its Applications, \textbf{2005}, v 357, issue I, h 64-70; http://www.sciencedirect.com/science/article/pii/S0378437105005005 ] hence multifractal can be related to group theory.

\textsuperscript{1}Many grateful Thanks to HE. Mr. Drs. P. SWANTORO & HE. Mr. Ir. SARWONO KUSUMAATMADJA
\textsuperscript{2}We reminds VENEZUELA as Owner of Largest crude oil deposite in the World to G Corso & LS Lacena, 2005 through April 4, 2014 cited to April 14, 2014 Tibisay LACENA existed quotes for the Presidential Election for the Republic of VENEZUELA, 2014

Widastra Hidajatullah-Maksoed
