

Abstract Submitted
for the APR15 Meeting of
The American Physical Society

Science Film: An Aperture into Science Advocacy — The current funding environment for scientific research necessitates a change in how we foster support for the endeavor. Federal spending is not likely to grow unless constituents—APS members—help communicate the value of science to members of Congress and the public in a compelling and individual way. The event explores how popular film with science-based plots can help physicists communicate the value of science to members of Congress and an increasingly diverse electorate.
