Exotic heavy-quark states at Belle¹ XIAOLONG WANG, LEO PIILONEN, Virginia Tech, BELLE COLLABORATION — The search for multi-quark states beyond the meson (quark-antiquark) and baryon (three-quark) has resulted in the discovery of many new exotic states of matter, starting with the X(3872) discovery by Belle in 2003. We report selected recent results on searches for such states at Belle.
