

Abstract Submitted
for the APR16 Meeting of
The American Physical Society

Exotic Meson Searches at CMS SULEYMAN DURGUT, Univ of Iowa,
CMS COLLABORATION — Exotic meson spectroscopy searches at the LHC have
yielded interesting results. The CMS collaboration announced a discovery in the
 $J/\psi\phi$ channel in 2014, and have extended their searches to more inclusive channels.
Results with the full Run 1 dataset of 4.9 fb^{-1} at 7 TeV and 20.7 fb^{-1} at 8 TeV will
be presented.
