Abstract Submitted for the APR17 Meeting of The American Physical Society

Hawking radiation from a collapsing quantum shell JORGE PULLIN, Louisiana State Univ - Baton Rouge, RODRIGO EYHERALDE, RODOLFO GAMBINI, Instituto de Fisica, Facultad de Ciencias, Universidad de la Republica — We study Hawking radiation from a collapsing shell with uncertainty in its position and momentum. We see there are deviations from the usual spectrum early on in the evolution, tending asymptotically to the usual spectrum plus small corrections.
