The American Physical Society

**Radiative decay of  $\eta'$  at CLAS** GEORGIE MBIANDA NJENCHEU, MOSKOV AMARYAN, ILYA LARIN, Old Dominion Univ, CLAS COLLABORATION — We will present preliminary experimental results of the radiative decay of  $\eta' \rightarrow \pi^+\pi^-\gamma$  based on CLAS data collected at Jefferson Lab during the photoproduction experiment  $\gamma p \rightarrow p\eta'$  for the center-of-mass energy from 1.96 to 2.72 *GeV*. The analysis is based on the highest statistics collected in this channel to date. This decay is sensitive to the box anomaly in gauge theory.
