Abstract for an Invited Paper  
for the APR17 Meeting of  
the American Physical Society

**BSM Searches at the LHC**

MICHAEL HANCE, UC Santa Cruz

With the discovery of the Higgs boson by the ATLAS and CMS collaborations in 2012, the Standard Model seems to be completed. Yet, there are reasons to believe that the SM is not the end of the story. From cosmological problems to theoretical issues it seems that there is Physics Beyond the Standard Model (BSM). This talk will summarize the efforts made by the ATLAS and CMS collaborations to discover such new physics. From Exotic and Dark Matter searches to SUSY and BSM Higgs.
