Abstract for an Invited Paper
for the APR17 Meeting of
the American Physical Society

From Mars to the Multiverse

MARTIN REES, University of Cambridge

Modern technology has allowed us to explore our universe in ways we never could before. We can see pictures beamed back to us from distant planets and "hear" massive black holes merging. The universe is a complex place, but what makes it so complex? Was ours the only "big bang"? Are we alone? Is our universe unique? Explore these questions and more as APS presents Lord Martin Rees and "From Mars to the Multiverse."
