Abstract for an Invited Paper  
for the APR20 Meeting of  
the American Physical Society

**Some Highlights from LIGO and Virgos Third Observing Run<sup>1</sup>**

MAXIMILIANO ISI, Massachusetts Institute of Technology

The LIGO and Virgo gravitational-wave detectors continue to produce invaluable information about the nature and distribution of black holes and neutron stars. In this talk, I will provide an overview of some of the highlights from recent observations, and explain their importance for physics and astrophysics.
