Abstract for an Invited Paper  
for the APR20 Meeting of  
the American Physical Society

**Discovery in the Fourth Dimension: Precision Timing in Particle Physics**

FRANK GOLF, University of Nebraska-Lincoln

Particle physics experiments are facing ever more challenging conditions. Detectors providing a precise time information can be a power tool for background mitigation. I will go over some precision timing detectors being developed for the next generation of particle physics experiments and prospects and challenges for precision timing in future experiments.
