for the APR20 Meeting of
The American Physical Society

Meet Your Future: Career Panel and Networking MIDHAT FAROOQ, APS — The majority of physics Ph.D. graduates go on to careers in the private sector or government labs, and the skills and experience that should be emphasized for employment in the private sector are different from academia. In this session, physicists and employers from outside academia will share their insights on how one can prepare for a non-academic career. The panel will be followed by a reception where meeting attendees can network with the panelists and industrial physicists.
