Could “ROC” Support My Hypothesis of The Dark Matter Ring

DAYONG CAO, Avoid Earth Extinction Association (501)(c)(3) — A new observation of “odd radio circles” has a structure which likes my hypothesis of the ring structure of the dark matter. The dark matter is a spacetime (background-wave) which has close-ring structure and center structure, a density of the spacetime (spacetime/massenergy), and a negative gravit. And the spacetime field can cause the Hubble’s Red Shift. If the “ROCs” are some high density structures of the spacetime (field) which can Redshift the high frequency radiations to low frequency radio waves, “ROCs” can be observed by the radio telescope. See Ray Norris, “WTF??: Astronomers are baffled by a new ghostly phenomenon in space”. <https://www.alternet.org/2020/12/astronomy-mysteries/>

0.0.1 See Dayong Cao, “Ring Structure of Center of Spacetime, DNA, and Extraterrestrial Being” , and “New Einstein Field Equation Explains of Dark Matter and Dark Energy”.
