Fluidic Data: Motivations and lessons learned in constructing an art installation at the CERN Data Centre

Johan Bonilla

University of California, Davis

[1] We would like to credit the CERN IT department for providing funding and personnel to execute the project.
[2] Work performed by author/presenter began while they were an ATLAS collaborator through the University of Oregon.
[3] The driving department within CERN was IT, however the team consisted of collaborators from ALICE, ATLAS, CMS, LHCb, the Engineering CERN department, and the artist Agnes Chavez.
