

Abstract Submitted
for the APR21 Meeting of
The American Physical Society

Double Regge Phenomenology VINCENT MATHIEU, Univ de Barcelona, JPAC COLLABORATION COLLABORATION — I'll present the latest results from the JPAC collaboration concerning photo- and hadro-production of two mesons in the high mass region. In this regime, the mesons are produced by double Regge exchanges. The application of double Regge phenomenology to the recent GlueX and COMPASS data will be presented.

Vincent Mathieu
