Abstract for an Invited Paper
for the APR21 Meeting of
the American Physical Society

Compact Binaries in Advanced LIGO and Virgo's Third Observing Run¹

SURABHI SACHDEV, Pennsylvania State University

Advanced LIGO and Virgo conducted their third observing run between 1 April 2019 and 27 March 2020. Data from this observing run is the most sensitive gravitational-wave data recorded so far. I will discuss the status and the latest results of gravitational-wave searches for compact binary coalescences during this third observing run.
